

PRODUCT DESCRIPTION

The flexible PVC anti-fatigue matting that provides comfort and safety in areas where chemicals and oil is being used. The non-slip diamond top finish can be supplied in a roll up to 18.3 metres making it one of the longest anti-fatigue mats for the toughest of applications.

FEATURES AND BENEFITS

- Checker-plate pattern gives a great visual appearance and offers an ultimate anti-slip surface
- Slight gradient hi-visibility yellow bevelled edge
- PVC top and an aerated foam base provides a soft but firm footing that gives increased performance to the user
- Solid top surface for dry applications
- Oil and chemical resistant
- A very tough and durable product designed for the most demanding applications
- Alternative widths available on request with the option to have your mat cut to length
